PROFESSIONAL EXPERINCE

- Mobile Application Developer  
Personal Project: No\_Debar  
Developed an attendance tracking app using Dart and Flutter, designed for daily use across multiple subjects, with data persistence for accurate tracking. Utilized MongoDB for backend data storage and created RESTful APIs tested using Postman for seamless data handling and integration.  
  
Responsive Gym Website  
Designed a responsive website for a local gym with a focus on user experience and cross-platform compatibility. Implemented backend functionality using MongoDB for data management and tested APIs using Postman.
- Participant, Smart India Hackathon 2024  
Project: ONROAD  
Contributed to developing AI-based solutions for real-world challenges in the ONROAD project, gaining hands-on experience in problem-solving, teamwork, and project development under time constraints.
- AWS Cloud Club Event Participant  
Session: Generative AI meets Branding  
Engaged with AI and branding experts, gaining insights into generative AI applications, and expanding skills in cloud and AI integration.
